

MicroPro®

TEN TOP REASONS WHY MicroPro®

- 1.** Long term field testing shows that MicroPro® treated timber provides effective protection against fungal decay and termite attack.
- 2.** First timber treatment process to receive EPP Status. MicroPro technology is the first treated timber process to be EPP (Environmentally Preferable Product) certified by Scientific Certification Systems based on a Life Cycle Assessment
- 3.** Lighter, more natural timber appearance.
- 4.** Improved painting and staining qualities.
- 5.** Better corrosion resistance for code-approved fasteners and hardware.
- 6.** End uses include interior and exterior, above ground and ground contact.
- 7.** Compatible with MicroShades®, an innovative micronised pigment colour system.
- 8.** Treated Timber Warranty*
- 9.** Approved for aluminium contact.**
- 10.** Approved BU, APVMA, AS/NZS1604, NZS 3640 and NZ EPA.
